Since the introduction of sleeve gastrectomy gained widespread popularity. However the complication of bleeding and leakage may limit its advantage. Leakage and bleeding are usually managed by suturing or other method. We study the efficacy and safety by using the clips on the staple line on 74 patients with BMI in more 40 over 2 years. The clips were applied on staple gastric line. There was leak or heamatoma need to be spiraled. More over applying the clips is shorter in time and easier than using suture. The usage of clips is safe, easy and decrease the bleeding may prevent leakage further extension of work may prove its metros
